Includes domain registration (if needed), account setup, WordPress installation, plugin installation, theme installation, customization, hosting, maintenance, management, for one year and even a free ad on our network.

Thank you for your time and consideration. **BustinLooseMedia.com**, is the parent company of **WildWebDesigner.com** and **BustinLooseHosting.com**, I know this is a bit confusing, but there is a reason, each offers a different product, and may be purchased separately, but as a package, will save you the hassles, and even additional costs of everything done individually.

All billing is done through **BustinLooseHosting.com**, we have a secure server, but we do not store any credit card information because we use PayPal.com for the processing, which makes it fast and easy for you, and PayPal is probably the most secure, best known and largest payment processor on the Internet, in fact, you probably already have a PayPal account yourself, and if we develop an e-commerce site for you, will be how you get paid as well.

All package prices are based on the time required to do the job right, (\$50 per hour) and these price groups are a guideline to help offer some insight as to what it may cost based entirely on your individual requirements. Of course Churches and other community or non-profit organizations will receive reduced rates.

I am passionate about what I do, I love my work, but bills must be paid, and website development/design is more involved than purchasing an off the shelf item like a TV. I am very critical about the details, the look, feel, functionality and so on, so during the project, and for the entire term of our agreement, I may tweak and fine-tune things, just to keep your website running smooth and looking good! Also, this being a guideline, I have to tell you that in most cases, a development project, will actually get many more hours of attention than listed, but, when we agree on an amount, that is all you pay, unless you add more work to the original project, or premium themes, plugins and services.

Once an agreement has been made, If you need domain registration, you or I can do that, then, you may setup your hosting account at **BustinLooseHosting.com**, or I will do it for you if you wish, it does go a bit faster if you do it, because there, you will select the same options as are listed here, and then make payment through PayPal, just follow the steps, it goes quick and easy, however, if I do it, you will receive an email, an invoice, which must be paid before work will begin. Remember, if we are building your site, choose one of the development options above, not a hosting option, if you get confused, call me, (979) 567-7654

When it comes to **plugins**, these are the bits of extra code, that add extra functions to the site, such as a photo gallery, shopping cart, social networks (facebook, twitter, etc.) and depending on the needs of the website, will be installed, setup, and in some cases, customized or modified, also, there are "premium" plugins available, which may require extra costs or subscription payments to the developer, in this case, the client will be informed, before such are used.

Theme installation and customization, this is the fun part, but, depending on your site needs, can eat up a lot of time, this is why we use themes as a starting point, it saves me time coding, and you money, but remember, they are but a starting point, your input is very important, and will save time on changes, so you need to tell me the colors you want, and choose a basic theme to start from etc. In fact, if you have seen a website that you like, show it to me, and tell me what you like about it, and what you don't, this is always a big help.

Although the site may be "Under Construction" if you wish, we can set your username and password where you may log in and see how it looks and let me know if you change your mind about a color or something, just remember, changes eat up time.

Hosting after the first year will also be based on the requirements for the website, if it is a small site, with average traffic and bandwidth use, it will be less than a huge site with higher traffic and bandwidth usage, but during the first year, unless the website requires special arrangements, hosting is free. See the rates at **BustinLooseHosting.com**.

It is the hosting plan chosen that determines your level of **maintenance and management**, initially, unless you and I know that you need more, the starter plan will be selected, if it becomes obvious to me later, that you need more, during this first year, I will upgrade your hosting account to allow for the additional size, bandwidth or other requirements, but at the end of the first year, it will automatically renew at the current level.

Free Ads, this is a bonus offered to all of my clients and can generate traffic to your sites, from other sites in the network, in turn, unless you tell me that you do not want ads on your site, at the end of each article (post), I will add the code for them to show up. If you see a particular ad that you don't like, let me know, I will take it out of the rotation for your site, and don't worry, we won't show ads from competitors sites. If you have a banner ad already, get it to me, I'll use it, if not, there is no charge for a basic ad design. I have been doing this for some time now, and the ads are

from other clients like you, and it really does help generate traffic for everyone involved, and here is the bonus, in the future, we will be selling ads, and all will share in the revenue generated from these ads. Also, we will have an affiliate program to either give you a little bonus or credit on your hosting account, until then, if you have a referral, that I develop a site for, I'll buy you a burger or something, just let me know.

Content is up to you, I will help you all that I can, and since WordPress is a very simple yet powerful platform, you should not have any problems with that, if you can send an email, you can use WordPress, however, call me anytime if you need help, that is what I am here for, just send me an email, or give me a call anytime (979) 567-7654.

The Agreement

This agreement is a simple one, basically something for our records and yours, however, it is binding for the first year on any payment plan, and on hosting accounts after the first year, late payments could get your account suspended and a late fee of \$10 after 10 days, delinquent accounts over 30 days will accrue interest charges in addition to the late fee, and could be removed after 90 days, once your balance is paid in full, if you are unhappy with our service, I will happily help you transfer your site to a new host, but once development of your website has begun, payment in full is required. I am a very easy going guy, and will redo your theme up to three times if you are not happy with it, but, after three times, if you are still not happy with it, I will refund 50% of what you have paid, if paid in full, if not, whatever payments you have made will not be refundable. I hate having to add all of that, but, just in case, it is there.

Thank you for the opportunity to serve you, I will do everything I can to help you with your website, and if you haven't noticed yet, I don't look at my clients as a paycheck, and maybe it isn't very professional, but I consider all of my clients to be my friends, and I will take care of my friends. Again, thank you for your business!

Either a signature below, or a payment made acknowledges this agreement, you may print and keep this for your records.
